

PRESS RELEASE

FOR IMMEDIATE RELEASE
23rd October 2007

Avanquest Solutions Demonstrates Disaster Recovery and High Availability for Blackberry Enterprise Server.

Avanquest Solutions, the recently appointed UK Solutions Centre for Neverfail will be presenting a short webinar on **Wednesday 31st October** to give resellers, channel partners and clients an overview of the Neverfail for BES solution – **the ONLY Disaster Recovery/High Availability Solution for BES (Blackberry Enterprise Server) on the Market!**

- Neverfail supports BlackBerry Enterprise Server straight out-of-the-box, saving time and money while eliminating time-consuming and costly customisation or scripting.
- Protects almost any auxiliary application, including anti-virus, backup, archiving, fax and more.
- Ensures high availability and disaster recovery over both LAN and WAN environments.

Traditional backup and replication solutions can't provide the rapid return to operations in the event of a failure.

Operating seamlessly in the background by constant synchronisation, Neverfail replicates data between active and passive servers in real-time. Should a problem occur, Neverfail will take pre-emptive, corrective action to fix the issue without resorting to a full-system failover, thus maintaining continuous application availability. Should a failover be unavoidable, for example to allow maintenance, Neverfail will seamlessly connect users to the passive server and business can continue without interruption.

The Webinar begins at 3.00 pm and will last for about 30 minutes. It will be followed by a Q&A session.

Anyone wishing to join the Webinar can call Katy Holman at Avanquest on 01962 835050 or register online at <http://corporate.avanquest.co.uk/company/Neverfail%20Webinar%20Registration%20Form.php>
